

Dear Hiring Manager in Axsos Academy,

I am excited to apply for the Junior Full Stack Developer position at Axsos Academy. With a strong foundation in web development, a passion for coding, and hands-on experience with both front-end and back-end technologies, I am eager to contribute my skills and grow as part of your development team.

I recently graduated with a Bachelor's degree in Computer Science from Al-Quds University. Through my academic studies and technical training, I developed experience with HTML, CSS, JavaScript, React, Python, Flask, Django, MySQL, and MongoDB. I have also worked with Git and GitHub and gained experience developing full-stack applications, connecting front-end interfaces with back-end APIs and databases. One of my projects involved building a job matching platform where I worked on user interfaces, authentication, APIs, databases, and communication between the front end and back end.

During my AI training at Jawwal, I also worked on AI-powered applications using Python, LangChain, and LangGraph. I worked with vector databases such as Pinecone, Qdrant, and FAISS and developed interactive applications using APIs and Streamlit. These projects strengthened my problem-solving skills and taught me how to learn and apply new technologies independently.

What draws me to Axsos Academy is the opportunity to work on real-world projects in a collaborative development environment. I am particularly interested in this position because it combines front-end and back-end development while giving me the opportunity to continue learning modern technologies. I am a committed and hardworking developer who enjoys solving problems, working with others, and continuously improving my technical skills.

I would be thrilled to discuss how my background, technical skills, and passion for development can contribute to Axsos Academy's development team. Thank you for considering my application. I look forward to the opportunity to speak with you further.

Sincerely,
Sajeda Salim
